OMNITRACKER
THE BUSINESS PROCESS ECOSYSTEM

BPMN

Business Process Model
and Notation

Your benefits

- ✓ Automation of repetitive and manual tasks
- ✓ Orchestration, monitoring and reporting of end-2-end processes across the entire IT landscape
- ✓ Easy configuration in a low-code environment
- ✓ Support with complex decisions thanks to detailed process overview
- ✓ Increased transparency for all process participants
- ✓ Resource savings thanks to reduced process cycle times

Process modeling & automation

With OMNITRACKER BPMN, you automate repetitive business processes. The BPMN technology follows the international standard BPMN 2.0, which allows you to transfer BPMN models to other systems (and vice versa). The OMNITRACKER BPMN Modeler is a graphical editor that enables you to structure and visualize business processes via drag-and-drop, leading to a better understanding of the process structure. Existing processes can also be supported and complemented.

The modeled workflows can then be automated with the OMNITRACKER BPMN Engine, so that all processes are executed quickly and reliably. BPMN increases the processing speed of all workflows in your company, so you can save resources.

Features of OMNITRACKER BPMN

Intuitive modeling

Standardized process visualization

Easy process automation

Connectors to third-party systems

Central database

Continuous process monitoring

Independent solutions

For companies of the SME sector to global players: We support all enterprises in the digitization and automation of IT and non-IT services. OMNITRACKER is used in all industries and company sizes. Thanks to our experience and flexibility, we serve all branches as well as niche sectors with individual solutions.

More services

Our consulting experts advise you on the development and implementation of your digital projects. As a reliable software partner, we have accompanied thousands of software projects in over 750 live systems. With this extensive experience and know-how, we support you in all phases: from requirement analysis and implementation to system migrations and workflow optimization —always with assistance of our technical support. Our trainings for end users, administrators and customizing trainings as well as web-based seminars complete the OMNINET service portfolio.

About OMNINET

OMNINET, headquartered in Eckental near Nuremberg, Germany, and with other national branches and international subsidiaries, is one of the market leaders in the field of business process software, especially in the field of IT and enterprise service management. The product portfolio ranges from a highly flexible platform for the digitization and automation of business processes to BI tools and cloud-based service management solutions.

OMNINET is certified to ISO standard and has been delivering certified and award-winning software products for 25 years—100% made in Germany. OMNITRACKER is the industry-independent software solution for an ITIL®4- and GDPR-compliant implementation of individual digitization strategies.
