![OMNITRACKER — THE BUSINESS PROCESS ECOSYSTEM]

Accessibility
Barrier-free software

Your benefits

- **Maximum usability for people with limitations with a focus on blind people and visual impairments**
- **Optimized user interface in the web client for improved usability for all users**
- **Quick access to relevant areas via shortcuts**
- **Easier readability of content thanks to contrastsettings, font sizes etc.**
- **Screen reader support through modern HTML5 attributes**
- **Advantages over the competition when formal or legal accessibility requirements exist**

Simple handling for everybody in the Web Gateway 2

People with impairments should be able to use software products without the need for external help. With the Web Content Accessibility Guidelines (WCAG), the Web Accessibility Initiative publishes standards and specifications, and shows how web services can become more accessible.

With the OMNITRACKER Web Gateway 2, it is possible to achieve accessible solutions in accordance with WCAG 2.1 Level AA. Among other things, the OMNITRACKER operating concept in the web client supports the output of content via screenreader. In addition, both information extraction in Web Gateway 2 and the operation of forms are possible via numerous shortcuts, so that the software can be operated almost entirely with the keyboard. This is not only an important requirement for visually impaired people, but also supports power users, e.g., in the help-desk or in the IT department.

Accessibility features in OMNITRACKER

Various contrast, color and layout outputs

HTML5 attributes for screenreader support

Structured navigation

Customizability for target groups

Keyboard operation

Accessibility according to WCAG 2.1. level AA

Independent solutions

For companies of the SME sector to global players: We support all enterprises in the digitization and automation of IT and non-IT services. OMNITRACKER is used in all industries and company sizes. Thanks to our experience and flexibility, we serve all branches as well as niche sectors with individual solutions.

More services

Our consulting experts advise you on the development and implementation of your digital projects. As a reliable software partner, we have accompanied thousands of software projects in over 750 running systems. With this extensive experience and know-how, we support you in all phases: from requirement analysis and implementation to system migrations and workflow optimization —always with assistance of our technical support. Our trainings for end users, administrators and customizing trainings as well as web-based seminars complete the OMNINET service portfolio.

About OMNINET

OMNINET, headquartered in Eckental near Nuremberg, Germany, and with other national branches and international subsidiaries, is one of the market leaders in the field of business process software, especially in the field of IT and enterprise service management. The product portfolio ranges from a highly flexible platform for the digitization and automation of business processes to BI tools and cloud-based service management solutions.

OMNINET is certified to ISO standards and has been delivering certified and award-winning software products for 25 years—100% made in Germany. OMNITRACKER is the industry-independent software solution for an ITIL®4- and GDPR-compliant implementation of individual digitization strategies.
